KANSAS, Extreme Southeast

(KS-Z073) BOURBON, (KS-Z097) CRAWFORD, (KS	S-Z101) CHEROKEE		
	04/07/07 22:00 CST	0	Frost/Freeze

04/09/07 07:00 CST 38.24M

Unusually warm conditions during the month of March caused early season growth in vegetation across extreme southeast Kansas. Hay along with the wheat crop had began to mature. During the nights of April 7th through the 9th, temperatures dropped into the low to mid 20s, causing a hard freeze on matured vegetation. The wheat crop suffered approximately 90% damage. Hay crops along with fescue seed also sustained major damage. Total crop losses for Cherokee, Crawford, and Bourbon counties were estimated at \$38,227,494.
